

EdG Math™

"From Counting to Calculus – For Grades K through 12"

Ed Gurukul
Education for the Real World

Ed Gurukul Enrichment Academy

Ed Gurukul Way: Please read information sheet on “Ed Gurukul Way” to know who we are, what we stand for and how we do.

EdG Math™ is Ed Gurukul’s flagship course that had been designed to challenge students to think and understand the concepts better so that they are ready to solve any problems given in school or in any competitive tests. We update the course content as needed.

Class: EdG Math Classes are very well structured with class room instruction in one session and tutoring help in another session. Classes are held throughout the year.

Modules and Grades: EdG Math has 6 strands covering all topics of mathematics that are needed in real world. All 6 strands (ref. to back page) are covered in all grade levels. EdG Math grade is nearly a level higher than their current grade. This challenges them to think ahead and solve advanced problems.

Add-On Modules: EdG Math™ comes with several add-on modules that can be enrolled for separately. They are provided to enhance specific skills and for certain students who would like to focus on those for short period of time. **Minute Math Module and Mind Math Module** are two add-ons offered as optional modules. Please check with one of the educators to know more about this as well.

Math Contests: Students will get prepared for several math competitions that are held in their schools or outside and they will also be eligible to take part in several math contests conducted by “TOURNAMETRIX CORPORATION” (www.tournamatrix.com) and hosted by Ed Gurukul throughout the year.

Math Club: Ed Gurukul will offer Math Club for students to get-together and solve contest math problems and help each other. This also brings leadership skills and teaching ability. This is student lead and administered club. Students can enroll for Math Club and make use of additional help to solve Contest Math problems, school homework or any math help in general.

MATHSTER™ CERTIFICATION: This certification is a standardized test offered by Tournamatrix corporation for all students across the united states. Students can take 7 level certification examination and aim to obtain the title of “Grand Mathster”. Please visit www.tournamatrix.com for all updates and announcements for current exams.

Levels	Arithmetic	Analytical	Prob. Solving	Puzzles
Numbers and Ops.	✓	✓	✓	✓
Algebra	✓	✓	✓	✓
