"Chess Intro to Class Pro !"

Chess has long been recognized throughout the world as a builder of strong intellects, but only recently has the United States begun to recognize chess's ability to improve the cognitive abilities, rational thinking and reasoning of even the least promising children.

Chess brings out concealed abilities that have not been reached by traditional educational means. It promotes logical thinking, instills a sense of self confidence, and self-worth, and improves communication and pattern recognition skills.

Chess teaches the values of hard work, concentration, objectivity, and, commitment.
